PROFESSIONAL SUMMARY

Full-Stack Developer & AI/ML Engineer with hands-on experience building enterprise CRM platforms, LLM-integrated products, and data-driven applications. Proficient in React/Next.js, Node.js, Python, and cloud-native architectures. Skilled at integrating Anthropic Claude, Google Gemini, Groq, and Scikit-learn into real-world systems. Passionate about automating workflows, surfacing business insights, and delivering scalable software.

EDUCATION & CERTIFICATIONS

B.E. Electronics & Telecommunication — PVG's COET, Pune 2022 – 2026

WORK EXPERIENCE

SDE Intern | Avirait Technologies, Pune Jan 2025 – Mar 2025

- ▶ Built ML-powered credit card reward tracking system using Scikit-learn and feature engineering — achieved 95% insight accuracy and identified \$50K in annual savings across 10K+ transactions.
- ▶ Designed NLP-based transaction categorization pipeline; boosted user engagement by 25% and retention by 40% through data-driven personalization strategies.
- ▶ Developed real-time recommendation engine with pandas and NumPy to surface contextual reward suggestions, reducing user effort by 30%.

PROJECTS

Clarusto — Enterprise CRM & HR Platform 2024 – Present

Next.js 16 · Express 5 · TypeScript · Supabase · Anthropic Claude API · PDFKit · Resend

- ▶ Architected a full-stack CRM/HR platform with 20+ REST modules covering sales pipeline, quotations, invoicing, time-tracking, HR, and document management — deployed on Vercel + Node host.
- ▶ Integrated Anthropic Claude API with structured low-temperature prompts to auto-generate invoice and quotation summaries, cutting manual review time by 40%.
- ▶ Designed automated invoice pipeline: multi-tax calculations, sequential numbering (INV-YYYY-####), PDFKit PDF generation, Supabase Storage upload, and Resend transactional email delivery.
- ▶ Implemented composable RBAC middleware (user / manager / super_admin) protecting 50+ endpoints; Postgres Row-Level Security migrations; audit logging via response middleware monkey-patching.

Live Market Analysis — F&O AI Trading Assistant 2024

Python · Anthropic Claude API · Streamlit · Zerodha Kite · pandas · NumPy · Telegram Bot

- ▶ Built AI-assisted NIFTY/BANKNIFTY decision-support system integrating Zerodha Kite, Yahoo Finance, and NSE bhavcopy with automatic multi-source fallback for uninterrupted data flow.
- ▶ Engineered a full technical analysis engine: RSI, EMA/SMA, ATR, Bollinger Bands, VWAP, pivot S/R, and candlestick patterns; options intelligence module computing PCR bands, OI walls, and max pain.
- ▶ Integrated Anthropic Claude API with grounded prompts for natural-language trade explanations; Telegram Bot alerts for real-time signals; Streamlit dashboard for live analysis..

Cheapest Product Finder — AI Price Comparison Engine Nov 2025 – Present

Python · Scikit-learn · NLP / TF-IDF · FastAPI · pandas · LLM summarizer

- ▶ Developed AI-powered price comparison system achieving 90%+ product-matching accuracy across 1,500+ real-time listings using NLP-based entity normalization and deduplication.
- ▶ Trained multi-class text classification models with Scikit-learn (TF-IDF + Logistic Regression / Random Forest) reaching 85%+ accuracy; reduced manual comparison effort by 70%.
- ▶ Built FastAPI backend for real-time product ingestion and price aggregation; integrated LLM summarizer to surface best deals with contextual reasoning and structured JSON output.

TECHNICAL SKILLS

AI / ML	Anthropic Claude API, Google Gemini, Groq, NVIDIA AI, Scikit-learn, NLP/TF-IDF, text classification, LLM prompt engineering, pandas, NumPy, walk-forward backtesting
Frontend	React 18/19, Next.js 15/16 (App Router), Vite, Tailwind CSS, Radix UI, shadcn/ui, TanStack Query, Three.js/R3F, Streamlit
Backend	Node.js, Express 4/5, FastAPI, Flask, REST API design, Serverless (Vercel/Netlify), Zod, TypeScript, Python
Data & DB	Supabase (Postgres · Auth · Storage · RLS), MongoDB/Mongoose, SQL, pandas, NumPy
Tools	Git, Docker, GCP, GitHub Actions, Travis CI, Stripe, Resend, Cloudinary, Zerodha Kite, PDFKit
